

NATIONAL SQUAD PLAYER PATHWAY

The diagram below shows how it is intended for players to progress through the pathway, once they are at the required levels. It also shows the fluidity of the process where players can come in and out at various stages along the pathway and by exiting can either come back in at a later stage or still be actively involved in performance netball by looking at other areas.

Each year trials will be held in accordance with the Swiss Netball Selection Policy and throughout the season, players can be selected to represent Switzerland at various events in line with the Swiss Netball Selection Policy.

By entering at one level, there is no guarantee that a player will progress all the way to the Open Squad – every year all current athletes will trial alongside any new identified athletes to try to gain a place in the pathway for the coming season. NS = National Squad
